- Foam receptacle pad kit
- Screw driver

Billing Options That Can Help:

Budget Billing allows you to pay approximately the same amount for electric service every month, making it easier to budget and plan for this cost regardless of the season and usage. Under this program, bills are, essentially, an average of 12 months of bills. Bills will vary every month, but only slightly.

Equal Pay allows you to make the same exact payment each month, with this amount being adjusted once a year. This amount is based on previous year's usage.
